This is the documentation of **pygeobase**.

Note: This is the main page of your project's [Sphinx](#) documentation. It is formatted in [reStructuredText](#). Add additional pages by creating `rst`-files in `docs` and adding them to the [toctree](#) below. Use then [references](#) in order to link them from this page. It is also possible to refer to the documentation of other Python packages with the [Python domain syntax](#). By default you can reference the documentation of [Sphinx](#), [Python](#), [matplotlib](#), [NumPy](#), [Scikit-Learn](#), [Pandas](#), [SciPy](#). You can add more by extending the `intersphinx_mapping` in your Sphinx's `conf.py`.
